

1  
2                                    ABSTRACT OF DISCLOSURE  
3

4            A tool employs a connect-disconnect coupling for a power drill to  
5 hold a multi-functional bit having at its one end a drill element  
6 adapted to form a hole and a countersink and at its other end a driver  
7 element to drive a screw or other type of fastener.
